EXAMINER

LIANG, LEONARD S

ART UNIT PAPER NUMBER

2853

DATE MAILED: 06/06/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/963,453	HASHIMOTO, KOICHI	
	Examiner	Art Unit	
	Leonard S Liang	2853	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 September 2001 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☒ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It is missing from the application.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 14 and 31. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 41, 42, 43, 52b-f, 53a-f, 55a-e, 60, 61a, 62b, 63c, and 64d. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: On page 11, lines 11-13; the specification states "The error detection **units 35 is** provided...and **serves**..." This is a minor grammar error. It will be construed that the specification should read "The error detection units 35 **are** provided...and **serve**..." Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2853

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okamura (US Pat 5777634) in view of Mitsuhsa (JP Pat 11-348385).

Okamura discloses, with respect to claims 1 and 7,

- a printing machine (See figure 1);

U.S. Patent
No. 5,777,634
Sheet 1 of 24
5,777,634

- at least one paper feed unit (See figure 1, references 5, 9, and 10);
- a printed sheet transportation unit (See figure 1, references 3 and 5);
- an error detection unit/step (See figure 3, references 100A; column 12, lines 48-55. Error is represented by the ink quantity being below a predetermined quantity);

- at least one error with which printing can be continued (“small quantity of ink”) and at least one error with which printing can’t be continued (“no ink”) - See figure 3, references 112A, 112B; column 12, lines 7-14. The storage device which serves to store an error classified table is thus inherent to the invention);
- and a control unit (See figure 3, reference 111; column 12, lines 40-62. The dot count means determines between the “small quantity of ink” and “no ink” errors).

Okamura discloses, with respect to claim 2, that the control unit is capable of taking control of the printing machine in order to continue the printing operation without suspending the printing operation when the control unit judges the occurrence of an error with which the printing operation can be continued. Okamura teaches that the control unit continues printing even when an ink is reduced to a predetermined quantity or less (small quantity), though the ink detection time is shortened (See column 12, lines 55-62).

Okamura discloses, with respect to claims 3-8 that the control unit is capable of reporting the result of judgment (whether “small quantity” or “no ink”) to the user (See figure 3, column 12, lines 7-14). Hence, an error reporting step is disclosed.

Okamura discloses, with respect to claims 5, 6, and 8 that the control unit is capable of reporting to the user information of the penalty in throughput when a current error as detected is

Art Unit: 2853

an error with which the printing operation can be continued (where throughput penalty is the amount of ink, or lack thereof, left before the ink becomes empty. See column 15, lines 33-36). Okamura teaches that "a user can visually confirm a quantity of remaining ink at all times while preventing an unexpected occurrence of malfunction of 'no ink'" (See column 17, lines 28-32).

Okamura differs from the claimed invention in that it does not disclose a plurality of image formation units each of which serves to perform a printing operation on a printing sheet.

Mitsuhisa discloses, with respect to claims 1-8, a plurality of image formation units (See figure 1 and English abstract).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the plurality of image formation units disclosed by Mitsuhisa into the invention of Okamura in order to perform a printing operation on a printing sheet. The motivation for the skilled artisan in doing so is to gain the benefit of being able to perform high speed printing while suppressing cost increase incident to parallel operation (See Mitsuhisa English abstract).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim (US Pat 5889595) discloses a method of stopping a printing operation upon reception of abnormal image data in a facsimile.

Kawanabe (US Pat 6219153) discloses a printer having a memory for storing a printer profile parameter.

Imai (US Pat 6123406) discloses a printer with residual ink detection.

Delacy (US Pat 4734868) discloses a precision paper transport system.

Yoshimura (US Pat 5262872) discloses an image forming apparatus with means for error detection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leonard S Liang whose telephone number is (703) 305-4754. The examiner can normally be reached on 8:30-5 Monday-Friday.

Art Unit: 2853

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (703) 308-3126. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7724 for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
